

# DOT9 APP

## *Fund Distribution Overview*

# THE DOT9 APP

represents a revolutionary step forward in the digital asset space, being the first application dedicated to trading, staking, and betting on the intrinsic value of gold and silver. This innovative platform not only allows users to engage with the precious metals market in a dynamic and interactive way but also solidifies a tangible connection to real-world assets. Every participant who mints an NFT from the DOT9 Genesis Collection is entitled to receive the physical gold or silver that underpins their digital asset, ensuring a seamless blend of digital engagement with tangible asset ownership.

In order to foster a robust ecosystem around the DOT9 APP and incentivize participation, a thoughtful fund distribution model has been established for the Solana and MultiversX blockchains. This model is designed to reward active community members, encourage new user onboarding, and enhance the overall user experience through various rewards mechanisms.

## **SOLANA FUND DISTRIBUTION: STAKING POOL (75%):**

The lion's share of funds is allocated to the staking pool, from which rewards are distributed to holders who actively redeem and stake their DOT9 NFTs. This approach ensures that the community is rewarded for their engagement and investment in the platform.

## **COMMUNITY INCENTIVES (10%):**

A portion of the funds is reserved for community incentives, rewarding members for contributing to the growth and positive environment of the DOT9 ecosystem.

## **REFERRAL REWARDS (10%):**

To encourage the expansion of the DOT9 community, referral rewards are offered to users who successfully recommend and onboard new members to the platform.

## **BETTING REWARDS (5%):**

The most active users in the betting arena are recognized and rewarded, promoting an engaging and competitive atmosphere within the DOT9 APP.

# MULTIVERSX FUND DISTRIBUTION:

## STAKING POOL (75%):

Similarly, on the MultiversX blockchain, a significant percentage of funds is directed towards the staking pool, rewarding users who stake their NFTs and contribute to the platform's liquidity and stability.

## COMMUNITY INCENTIVES (10%):

This allocation supports the growth of a vibrant and supportive community within the MultiversX ecosystem, rewarding engagement and participation.

## REFERRAL REWARDS (10%):

Acknowledging the importance of community growth, referral rewards are given to those who bring new users to the DOT9 platform, enhancing its reach and impact.

## BETTING REWARDS (5%):

Active bettors on the platform are rewarded for their participation, adding an extra layer of excitement and reward for engaging with the DOT9 APP.

## ROYALTIES DISTRIBUTION:

In addition to the blockchain-specific fund distributions, a significant portion of the royalties generated by the DOT9 Genesis Collection will be reinvested into the community. Specifically, 90% of these royalties will be added to the staking pool, further enriching the rewards available to NFT holders who actively participate in the ecosystem.

The remaining 10% of royalties are allocated to the DOT9 team, supporting ongoing development, maintenance, and enhancement of the platform.

This fund distribution model is crafted to ensure a balanced and sustainable ecosystem that rewards participation, fosters community growth, and maintains the innovative edge of the DOT9 APP as the leading platform for trading, staking, and betting on gold and silver.
